
Real paper. Real strength.

Tri-Brite™ envelopes are designed to ensure that contents arrive safely, securely, and cost-efficiently. They combine the benefits of real bright paper with the durability of a

synthetic paper using a paper/film/paper construction. Tri-Brite envelopes provide a strong, moisture-resistant packaging system with a bright printing surface.

Tri-Brite™

TRI-BRITE™ FEATURES

- **Print, Ship and Shine with Tri-Brite Envelopes:**
Durable shipping with a bright white canvas perfect for print.
- **Looks Can Be Deceiving**
Tri-Brite appears to be a lightweight paper grade but, in fact, it performs like a real heavyweight.
- **Simplify Your Printing Process**
Because it's easier to print on than other substrates, Tri-Brite could potentially save you both time and money when protection is critical.

REAL PAPER. REAL STRENGTH. Tri-Brite is tear resistant, lightweight and also moisture resistant. It combines the printing benefits of real paper with the durability of laminated paper construction.
