
Tear resistant. Moisture resistant. Plays well with the environment.

Make the most of what you ship with FiberCraft® EF. Its polyester fiber scrim makes it tear resistant, and its moisture resistance keeps envelopes well intact in wet and humid conditions. What makes FiberCraft EF one-of-a-kind

is its unique use of recycled materials; 76% of FiberCraft EF is composed of recycled paper content, 68% of which includes postconsumer office paper and packaging waste. Make the most of your resources and ship with FiberCraft EF, your recycled, durable shipping option.

FIBERCRAFT® EF FEATURES

Fibercraft EF is your environmentally friendly, non-tear substrate with excellent rigidity. This 2-ply laminated product is ideal for environmentally focused customers and specialized mailings.

- Reinforced with a polyester fiber scrim to resist tearing
- Resistant to moisture, keeping envelopes intact in humid or wet conditions
- Prints easily on Kraft paper surface without distortion
- Allows for easier handling due to 2-ply rigid Kraft paper

Environmentally Friendly

76% recycled materials with 68% postconsumer content.

Water and Tear Resistant

Fibercraft EF uses one layer for water resistance and another unique scrim for durability, giving it a three-dimensional look and feel.

RESISTANCE, RIGIDITY, ENVIRONMENTALLY FRIENDLY. A cross-fiber scrim and 2-ply Kraft paper provide superior rigidity for easier handling and processing. Fibercraft EF's polyethylene film layer protects content from inclement weather and acts as a barrier to humidity.
