

Your supply chain just got stronger.

HERCULINK™

With its strength, durability and ability to stand up to abuse, Herculink™ envelopes are a strong choice for all your soft packaging needs. Herculink's uniquely textured design

makes it burst and tear resistant, while its poly barrier adds water resistance, creating durability second to none. Put some power behind your choice in envelopes. Ship with Herculink.

HERCULINK™ FEATURES

Herculink envelopes provide valuable protection for important information. These envelopes have a unique look that makes your recipients want to open them. The reinforced fiber provides superior protection against bursting, while its poly layer provides moisture resistance.

- **Textured design and look**

- **Burst and tear resistance**

- **Durable and moisture resistance**

Used by graphic designers for high-end clients for its protective properties and durability.

- **Distinct and rigid**

The health care industry uses Herculink because its distinct look and rigidity are perfect for automated mailings.

- **Ink-Jet Compatibility**

With the right ink-jet system, Herculink provides the capability of personalization at the point of fulfillment.

- **Sustainability**

Made with a PEFC sheet, Herculink does not reduce or diminish our forests.

STRENGTH. AESTHETICS. LIGHTWEIGHT. Herculink combines excellent protection with a unique look and feel. Its tri-dimensional structure gives Herculink protection against bursting and tearing, all at a competitive price point.
